

Sugar Blossom's Web page

Gathering requirements

By Paola Hernández Porras

Objective

- Make a Website for the Sugar Blossom bakery which reflects the personality of the brand and makes people connect with the brand.

Requirements

- Static web page, the web page is just a site for information about the brand, services and products. No need for databases.
- Include a section for a "Get to know" the company, include story of brand.
- Include a second page for the product and services.
- Include a third page with contact information and how to hire Sugar Blossom's services.
- Add photographs of Sugar Blossom activities.
- Include colors to contrast with pink. The pink color is part of their brand.

Design

- Work with .NET core to have a cross-platform website.
- MVC architecture pattern.
- Three web pages divide into: Home page, services page and contact
